

Prompt: Design and Develop the Official Website for Mindle

You are an award-winning Product Designer, UX Researcher, Brand Designer, and Senior Frontend Developer.

Your task is to design the official website for **Mindle**, a modern AI and software company.

About Mindle

Mindle is a technology startup focused on building software products powered by AI. Our long-term vision is to become a product-first company that owns multiple successful SaaS platforms, mobile applications, AI tools, and developer products.

While we currently provide software development, UI/UX design, AI consulting, and web development services to generate revenue, these services are secondary. The website should make it clear that Mindle is building products for the future.

Think of companies like Stripe, Notion, Linear, Vercel, OpenAI, Figma, and Framer. The brand should feel premium, modern, clean, trustworthy, and technology-first.

Design Philosophy

The website should feel:

- Modern
- Minimal
- Premium
- AI-first
- Elegant
- Fast
- Clean
- Product-focused
- Startup-oriented

Avoid generic agency designs.

Every section should communicate innovation and long-term vision.

Brand Personality

- Intelligent
 - Friendly
 - Innovative
 - Confident
 - Professional
 - Future-oriented
 - Human-centered
-

Target Audience

Primary Audience

- Startup founders
- Businesses
- Developers
- Product teams
- Entrepreneurs
- Investors
- AI enthusiasts

Secondary Audience

- Potential employees
 - Design clients
 - Software engineering clients
 - Students
-

Website Goals

1. Showcase Mindle as a technology company.
2. Highlight our software products.
3. Generate leads for services.
4. Build credibility.
5. Recruit talent.
6. Create excitement about upcoming products.

7. Present Mindle as a long-term technology brand rather than a freelance agency.

Website Structure

Home

Include:

- Hero section
- Powerful headline
- Short description
- CTA buttons:
- Explore Products
- Work With Us

Include a beautiful 3D or futuristic hero illustration with subtle animations.

Products

This should become the centerpiece of the website.

Display products as premium cards.

Each product card should include:

- Logo
- Product name
- Short description
- Status:
- Live
- Beta
- Coming Soon

Each product gets its own dedicated page.

Product pages should include:

- Hero
- Features
- Screenshots
- Pricing (if applicable)
- FAQ
- CTA

The website should support unlimited future products.

Services

Keep services as a supporting section.

Include:

- AI Development
- SaaS Development
- Full-Stack Development
- Web Applications
- Mobile Apps
- UI/UX Design
- Automation
- Cloud Solutions

Each service should explain:

- What it is
 - Process
 - Technologies
 - Timeline
 - CTA
-

Case Studies

Include:

- Featured projects
 - Problem
 - Solution
 - Technologies
 - Results
 - Screenshots
-

About

Include:

Mission

Vision

Values

Journey

Timeline

Team

Why Mindle exists

Careers

Display:

Primary CTA

Footer

Include:

Quick Links

Products

Services

Resources

Company

Newsletter

Social Media

Copyright

Privacy Policy

Terms

Design System

Typography

Use modern fonts like:

- Inter
- Geist
- Manrope

Spacing

Use an 8-point spacing system.

Rounded corners

12–20 px

Grid

12-column responsive layout

Container width

1280–1440 px

Generous whitespace.

Color Palette

Primary Background:

White (#FFFFFF)

Primary Text:
Near Black (#111827)

Accent:
Electric Blue

Secondary Accent:
Purple

Success:
Green

Warning:
Orange

Neutral grays for supporting elements.

Use gradients sparingly.

Components

Buttons

Cards

Feature cards

Product cards

Testimonials

Pricing cards

Timeline

Accordion

Tabs

Mega Menu

Modal

Newsletter

Forms

Badges

Chips

Code blocks

Statistics

Animated counters

Animations

Smooth scrolling

Fade-in sections

Hover animations

Card elevation

Micro-interactions

Animated gradients

Subtle parallax

Avoid excessive motion.

Responsiveness

Desktop

Tablet

Mobile

Everything should scale naturally.

Accessibility

WCAG AA compliant

Keyboard navigation

Proper contrast

Semantic HTML

ARIA labels

Alt text

Visible focus states

Performance

Optimize for Core Web Vitals.

Use lazy loading.

Optimize images.

Minimal JavaScript.

Fast loading.

SEO

Semantic headings

Metadata

Structured data

Open Graph

Twitter Cards

XML sitemap

Robots.txt

Tech Stack

Prefer:

Next.js

React

TypeScript

Tailwind CSS

Framer Motion

shadcn/ui

Lucide Icons

Final Deliverables

Create:

- Complete responsive website
- Design system
- Component library
- Landing pages
- Product pages
- Service pages
- About page
- Careers page
- Blog page
- Contact page
- Footer
- Navigation
- Mobile navigation
- Dark mode support
- Professional illustrations
- Beautiful animations

The final website should feel comparable in quality to modern SaaS companies like Stripe, Linear, Vercel, Notion, Figma, OpenAI, and Framer while maintaining Mindle's own unique identity as a product-first AI software company.
